

No gang colors

Going to some of the stores around my area as well as other municipalities, I've noticed signs that say "No gang colors allowed";

Such signs seem to be directed exclusively toward males as only males would wear gang colors, females of course can wear all kinds of colors and of course only males are in gangs, not females.

This of course is a bunch of bulox, there are plenty of females in gangs, but since they are females they can wear gang colors and have it called as being fashionable.
